

Taunton's own Internet Service Provider going from strength to strength

BlueShift Internet Ltd, who operate successful local brand names including Web-Design UK and newly-launched Taunton Broadband, have had another record year; complemented by the successful award and completion of web site and IT contracts for government departments, local businesses, and international company Dorel UK Group (the owners of successful Quinny and Maxi-Cosi child safety products.)

This year, which saw annual sales growth again exceed 150% marks a significant landmark in the company's continuing success and focussed on investment in their own infrastructure. Doubling the team and moving into expanded premises in Victoria House, managing director Matthew Baker said "Customer service is always our top priority and we have therefore continued to invest very considerably in new offices, more staff and more resources – all to deliver the best possible service at the best possible price. Our customers very much like the friendly local service from a company that they can trust to deliver and this is shown in both our strong sales figures and our work with big, well known brands and organisations. We offer customers a professional, bespoke and very high quality service coupled with no call centres and even 9:30-8pm availability on a Taunton number."
